

WHICH ONE WILL YOU BE?

9 Types of Software Developers

9 main areas of programming

- 1% Language/Compilers
- 3% Embedded Systems
- 3% Operating Systems
- 7% Data Science
- 8% Video Games
- 11% Dev Ops

(Dev Ops) Development & Operations Engineers were previously called system admins. Their job is to manage and maintain the computer infrastructure and servers of a company. Dev Ops do not build software, they actually write code to manage the servers.
